REASONS FOR ALLOWANCE

1. Claims 3-4, 6, 11-12, 14, and 18-20 are allowed.
2. Claims 1-2, 5, 7-10, 13, and 15-17 are cancelled without prejudice.
3. The following is an examiner's statement of reasons for allowance:

The prior art of records fails to disclose or render an obviousness of a method of implementing a two-dimensional pyramid filter bank comprising: first adding a first and a last input signal sample to a sum of input samples of a next lower-tap filter of a current filter; and second adding the output of first adding to an output signal sample of the next lower-tap filter of the current filter wherein the first and second adding is performed by different adders and is applied by column and row respectively as cited in independent claims 3 and 11 and further include a multiplexer, two flip-flops, a two-input adder, and a three-input adder as cited in independent claim 18.

The closest found prior art is Acharya (U.S. 6,662,200). Acharya discloses in Figures 5-6 first adding a first and a last input signal sample to a sum of input samples of a next lower-tap filter of a current filter; and second adding the output of first adding to an output signal sample of the next lower-tap filter of the current filter. However, Acharya fails to disclose the first and second adding is performed by different adders and is applied by column and row respectively and the circuit including a multiplexer, two flip-flops, a two-input adder, and a three-input adder as cited above.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
